FINANCE WITH

BLC TOKEN! 🌟

🚀 Invest in BLC Token: Your All-in-One Crypto
Solution! 🌐

🌟 Why BLC Token?

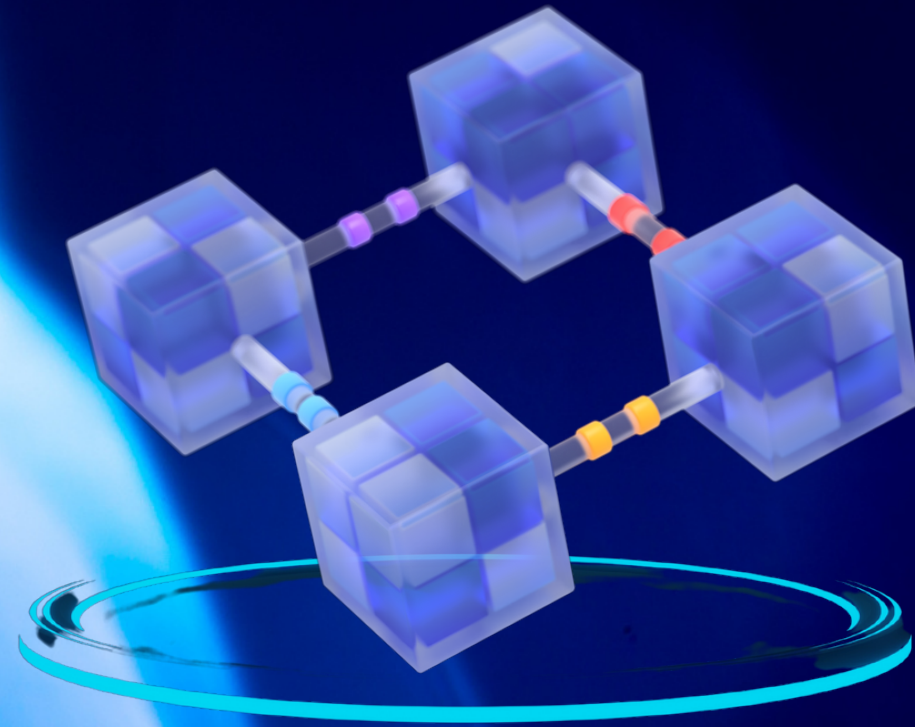

- Access DeFi, NFTs, Gaming, Crypto Expos, and more.
- Built on the efficient Polygon blockchain.
- Land NFTs in the Metaverse tech park.
- Enjoy crypto education and utility payments.
- Join a vibrant community of forward-thinkers.

🚀 Don't miss out on the future of finance with
BLC Token! 🌟💎

What is **BLOCKCHAIN TECHNOLOGY ?**

Blockchain is a decentralized ledger that records and tracks assets, whether tangible like houses and cars, or intangible like patents and copyrights, ensuring transparency and immutability across a network.

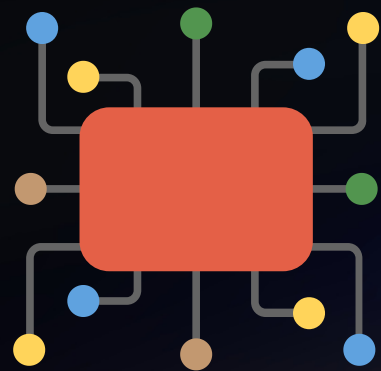

Blockchain can track and trade almost any valuable item, reducing both risk and costs for participants.

Quick and accurate data is preferable, and blockchain is perfect for providing it.

A blockchain network can monitor orders, payments, accounts, production, and other aspects.

What is **SMART CONTRACT**

Distributed

Predictable and rule-based.

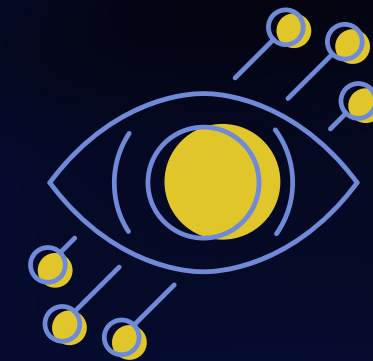

Everyone on the network is guaranteed to have a copy of all the conditions of the smart contract and they cannot be changed by one of the parties. A smart contract is replicated and distributed by all the nodes connected to the network.

Deterministic

Spread across multiple locations or entities.

Smart contracts can only perform functions for which they are designed only when the required conditions are met. The final outcome will not vary, no matter who executes the smart contract.

Transparent

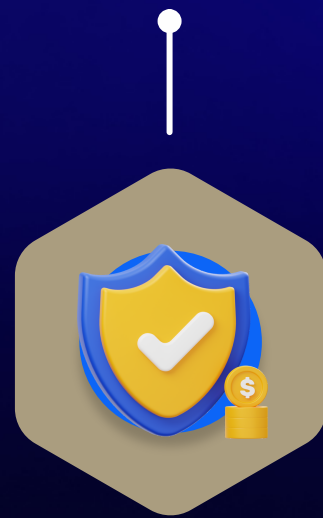

Easily visible and comprehensible.

Smart contracts are always stored on a public distributed ledger called blockchain due to which the code is visible to everyone, whether or not they are participants in the smart contract.

Benefits Of SAMRT CONTRACT

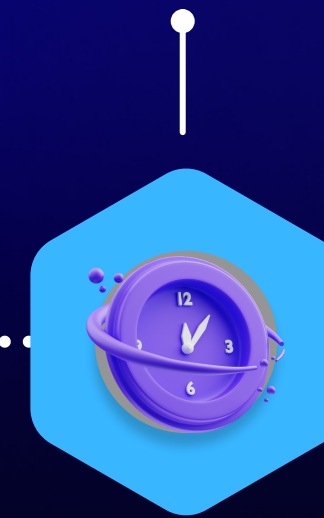

Enhanced Security

Trustworthiness

Rapid Performance

Autonomous

Uninterrupted Operations

Benefits Of SAMRT CONTRACT

Enhanced Security:

Smart Contracts are renowned for their robust security measures, offering a high level of protection against unauthorized access and tampering.

Rapid Performance:

Smart Contracts operate swiftly, bypassing the time-consuming negotiations and paperwork associated with traditional contracts, resulting in faster execution.

Autonomy:

Once established, Smart Contracts operate autonomously, requiring minimal ongoing oversight and intervention, freeing up valuable time and resources.

Trustworthiness:

These contracts instill trust by executing automatically based on predefined rules, eliminating the need for intermediaries and human interpretation.

Uninterrupted Operations:

These contracts instill trust by executing automatically based on predefined rules, eliminating the need for intermediaries and human interpretation.

Why Decentralized Blockchain is best?

WHAT IS CENTRALIZED BLOCKCHAIN?

Technology can be used to establish private blockchains overseen by one entity, centralizing them. On the other hand, public blockchains are open to all and operate in a decentralized manner.

WHAT IS DECENTRALIZED BLOCKCHAIN?

In blockchain, decentralization means shifting control and decision-making from a single entity or group to a widespread network. Such decentralized systems aim to reduce the need for trust among participants and prevent any member from gaining undue influence or control that weakens the network's effectiveness.

POWERD BY
POLYGON

TOKENOMICS

Total Supply: 10,000,000. BLC

SUPPORTED WALLET

BLUECOIN FINANCE

MetaMask: A browser extension wallet for Chrome, Firefox, and Brave browsers. It's also available as a mobile app for both Android and iOS.

MyEtherWallet (MEW): A free, open-source, client-side interface that helps you interact with the Ethereum blockchain. It allows you to create a wallet and store Ethereum and ERC-20 tokens.

Trust Wallet: A mobile-first wallet that supports Ethereum and ERC-20 tokens. It also supports other blockchains and their respective tokens.

Ledger Nano S/X: Hardware wallets that provide a secure way to store your cryptocurrency offline. They are integrated with software wallets like MyEtherWallet for managing ERC-20 tokens.

Trezor: Another hardware wallet option that can be used in conjunction with software wallets like MyEtherWallet and MyCrypto to manage ERC-20 tokens.

Exodus: A desktop and mobile wallet that supports Ethereum and several ERC-20 tokens, with a built-in exchange feature.

Coinbase Wallet: A user-controlled wallet where you can store ERC-20 tokens. It's different from the main Coinbase app, as the Coinbase Wallet is a decentralized wallet where users have control over their private keys.

Atomic Wallet: A desktop and mobile wallet that supports a variety of coins and tokens, including ERC-20.

imToken: A feature-rich mobile wallet that supports Ethereum and ERC-20 tokens.

FAQ

BLUECOIN FINANCE

Is the liquidity locked on sushi.com?

Yes. Liquidity is locked for 20 years on the Polygon Blockchain.

Is the liquidity burned on sushi.com?

Yes. Liquidity is burned & transfer it on zero / null address on the Polygon Blockchain

How many liquidity locked on sushi.com?

95% token is locked & burned on Polygon Blockchain.

FAQ

BLUECOIN FINANCE

How many Token to be burned on every Buy / Sell / Transfer?

2.% token to be burned from every Buy / Sell / Transfer.

How to Earn Bonus from BLC Token?

You can profit from Bluecoin Finance by establishing accounts with specific financial entities and engaging in a token-driven economy bolstered by incentives. But the rewards don't stop there; you can also capitalize on numerous other opportunities depending on your investment returns and gains.

FAQ

BLUECOIN FINANCE

Is It Important If I Purchase BLC Token on the Polygon Blockchain (ERC20)?

Typically, it doesn't matter. Thanks to a bridge available for use anytime, token prices remain fairly consistent. Say, for instance, you acquire the Bluecoin Finance Token on a different blockchain and later notice a slightly higher price for the BLC Token on the Polygon Blockchain. You can seamlessly transfer your tokens to the Polygon blockchain via the bridge and capitalize on the better rate. Bridging is free of charge.

WHY BLC IS A METAVVERSE TOKEN:

- 1. Instant Access: No application or account setup needed. Simply create a wallet, and you're in.
- 2. Pseudonymity: Skip the personal details. No name, email, or personal information required.
- 3. Agility: Transfer assets on your terms, anytime, anywhere—no permissions, no long waits, no exorbitant fees.
- 4. Speed: Dynamic interest rates and rewards, often refreshed as fast as every 15 seconds—outpacing many traditional systems.
- 5. Transparency: Full transaction visibility for all, a stark contrast to the guarded operations of many private corporations.

FAQ

BLUECOIN FINANCE

WHY CHOOSE BLC TOKEN?

- 1. Autonomous Operation: BLC operates devoid of human intervention. The smart contract is independent, ensuring the platform's uninterrupted functionality.
- 2. Transparent Referrals: No concealed charges. All transactions occur directly between members, bypassing middlemen. Additionally, the contract balance remains negative.
- 3. Consistent Terms: Exclusion from the platform isn't possible as the contract lacks such provisions. Your participation is unassailable.
- 4. True Decentralization: BLC stands apart with no centralized management or administrators. Its creators are equal community members, leveling the playing field.
- 5. Real-time Transactions: As profits roll in, they directly land in your personal wallet without delay. The system avoids accumulation, guaranteeing you full possession of your earnings.
- 6. Absolute Clarity & Privacy: The public nature of the smart contract code allows for full transaction visibility, ensuring genuine conditions and accurate platform metrics.
